Figure 1 Performance of share price and Long-Term Return Target

## Monthly comments

February is a short month and that influenced the interest received. In our portfolio, 29,30 and 31 are dates with many loan payments. Borrowers rarely pay the interest and principal ahead of time and with only 28 days in February the interest received was significantly lower than expected and this gave a result of $0.519 \%$ for the month of February.

This is an opportunity to recall, that QP2PL only record interest received as income when the actual cash flow takes place. A payment related to February will not be recorded as income in February, if it is received after month end.

Since inception, Quantrom P2P Lending has given a return of $18.48 \%$ and outperformed the Long-Term Return Target by 4.31\%-points.

We continue following our cautious approach and have made a small provision in the monthly result of less than $0.01 \%$ for "defaulted" loans in February 2019.

Loans in default fell to $1.0 \%$ of the portfolio. Current loans were at the end of February up to $75.7 \%$ of the portfolio.

## QUANTROM

## Portfolio

The portfolio at the end of February 2019 consisted of more than 7,300 loans. The weighted average interest rate on the portfolio was $11.5 \%$ with an average weighted maturity of 32 months.

The main exposure in value is still towards Car Loans and increased slightly to $64 \%$ of the value of the portfolio at the end of the month.

Exposure towards property loans is $18 \%$ of the value of the portfolio. At the end of January, personal loans represented $12 \%$, while business loans were at $6 \%$ of the value of the portfolio.

Figures 2-12 provide more details on the composition of the loan portfolio.
